**Suggested Shipping:** Pick-up by Durango truck in Smithers

**Order Notes:**

GPS Antenna should be compatible with the Garmin as long as it is a MCX connector. However, might check to see if there are power constraints that a handheld may not be able to handle. The survey chain must be made of a non-strech material (ie. fiberglass), but must be light weight to be carried in the field by foot. I am not sure what measurements they come in, but we will be using them to measure 50-100m intervals. Bear spray holsters: In the past I have found that holsters without a velcro strap that covers the top of the canister, don not provide enough protection for the safety on trigger.

**Delivery Notes:** Awaiting for info from Ian on the chain. waiting for mobile on line for info on the compatibility of the marine antenna/ and how long backordered.
